### PARTICIPATION BY ALL STUDENTS INSTEAD OF FOCUSING ON A FEW BRIGHT ACHIEVERS

Instead of a structure built to promote success for a selected few, we adopt an approach which encourages participation of all students in all the programs offered to them, instead of segregating them based on their talents and present skills. Our focus is to improve each child from where he or she is, to the best that is possible. We need to provide children a sound base in different areas so that they can learn in a sustained manner with increasing intensity.

We believe that elementary schooling from Class I to Class VIII is one of cognitive development, shaping reason, intellect and social skills, as well as the skills and attitudes necessary for moving forward to the higher classes. Education during this period must be of an integrated character, enabling children to acquire facility in language and expression and to grow in self-confidence as learners, both within and outside the school. We wish to clarify certain things related to our approach of teaching-learning process and acquisition of knowledge by our students.
